

C AD 50-S D[®]

Foam additive for hydroxide

Product description

AD 50-S is a foam and cleaning enhancing additive to hydroxide to produce on site a high foaming alkaline cleaner.

Properties

AD 50-S is based on high foaming non ionic surfactants, sequestering agents and corrosion inhibitors.

AD 50-S can be used as an additive for all alkaline cleaning activities in food industry.

Directions for use

AD 50-S can be added to a concentrated hydroxide solution (e.g. Sodium hydroxide 30%) in a ratio of 15% (85% hydroxide + 15% AD 50-S).

This mixture can be used at 5% with a foaming device.

Specifications (indicative values)

Appearance:	foaming colourless liquid
pH :	11.0
Density (20°C):	1.145 kg/l
Freezing point:	-10°C

Corrosion data and -precautions

- Please check the MSDS.
