

< CHLOROFRESH >

Sanitary cleaner

Product description

CHLOROFRESH is a degreasing, disinfecting and deodorising cleaning product for sanitary rooms.

Properties

CHLOROFRESH can be used for the cleaning and disinfection of toilets, dustbins, sanitary rooms and all fatty surfaces in the food industry.

CHLOROFRESH is based on sodiumhydroxide, sodium hypchlorite, stabilizers, sequestering agents (against calcium deposits), foaming agents, corrosion inhibitors and eucalyptus extracts.

Directions for use

- With high pressure cleaner:
Use 1-3% **CHLOROFRESH**; rinse under high pressure
- Manual:
dilute 2% **CHLOROFRESH** a bucket with lukewarm water, rinse afterwards with clean water.
