## hygiene for catering and sanitary equipment

### Product description

**SANIFRESH** is a decalcifying, decontaminating, degreasing and deodorising cleaning product for catering and sanitary hygiene.

### Properties

**SANIFRESH** is based on lactic acid, sequestering agents (against lime scale), corrosion inhibitors, surfactants, non-ionic surfactants and eucalyptus extracts.

**SANIFRESH** can be used for the cleaning and decontamination of caterings, trash bins and sanitary equipment.

**SANIFRESH** removes lime scale and brings a shining effect to the treated surface.

### Directions for use

- Manual:  
Dilute 1-5% **SANIFRESH** in a bucket of luke warm water; after application rinse with pure water.
- Heavy contaminated surfaces:  
**SANIFRESH** use pure. The product sticks to the surface due to its gel structure (increases contact time).

### Specifications

Appearance:	Red-pink thick liquid
pH (1%):	3.0
Density (20°C):	1.050 kg/l
Freezing point:	-3°C

### Corrosion data and -precautions

- Please check the MSDS.
